ISO FLANGES

Our ISO flanges are manufactured according to specifications published by the PNEUROP Bulletin 6606*.

DVM uses the name ISO to designate the flanges covering tubes sizes from 2" through 20".

These flanges are known by different names depending on the manufacturer, and are compatible with all other manufacturers who use the PNEUROP specifications.

DVM has elected to manufacture the flanges to fit the more readily available, standard USA tube sizes from 3/8" to 20" rather than the European tube sizes.

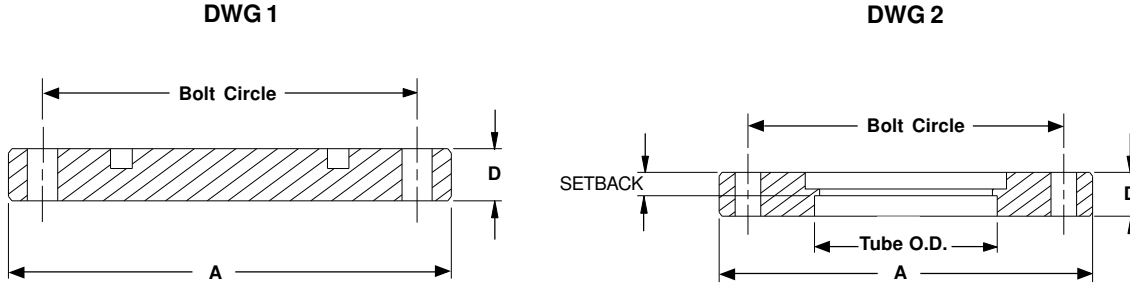

PART NUMBER	FLANGE SIZE	DWG	A DIAMETER	TUBE O.D.	SETBACK	C	CLAMPS REQUIRED	PRICE \$
120000	ISO-63	1	3.74	-	-	.47	4	55
